Full Stack Engineer

Full Stack Engineer building and shipping production web and mobile applications across startups and agencies. Specialized in React, Next.js, and React Native on the frontend, with Node.js and Java Spring Boot services, REST APIs, and AWS-based infrastructure behind them. Currently leading a development and QA team as a Tech Lead, owning features end to end from architecture and API design through deployment within remote, distributed teams.

Experience

Tech Lead & Full Stack Engineer, Foodeals MEA, Fes, Morocco · Remote · Freelance *Feb 2026 – Present*

- Lead a cross-functional team of developers and QA engineers, owning technical direction, task breakdown, and end-to-end delivery across web and mobile products.
- Architect and build full-stack features with Next.js, React Native, and Java Spring Boot, setting the patterns and standards the rest of the team follows.
- Drive code quality through code reviews, mentoring, and technical standards, unblocking developers and keeping the codebase consistent.
- Own backend services, APIs, and cloud infrastructure on AWS (EC2, S3, Amplify) with Cloudflare, overseeing reliable, reproducible deployments.
- Run Scrum ceremonies and sprint planning in Asana, aligning engineering and QA to ship features on schedule.

Full Stack Developer, Maccasy Agency, Brussels Region, Belgium · Remote · Full-time *Dec 2025 – Present*

- Build and ship full-stack web and mobile applications, from responsive interfaces to backend and database features.
- Integrate third-party APIs and design data flows that hold up in production across varied client stacks.
- Collaborate within a remote team to deliver maintainable, well-structured codebases under client timelines.

Full Stack & Mobile Application Developer, Simple-A Tutoring, Beirut, Beirut Governorate, Lebanon · Remote · Part-time *Jan 2025 – Jan 2026*

- Built web features for an education platform using Next.js, Remix, TypeScript, and Material UI.
- Shipped cross-platform functionality, extending the same product to mobile with React Native.
- Extended Node.js REST APIs deployed on AWS, tuning frontend and backend performance for a smoother learning experience.

Software Engineer Remote, GatherADU, Los Angeles, CA, United States · Full-time *Jan 2025 – Oct 2025*

- Developed product features on a Next.js stack with Supabase and Prisma, including authentication, data access, and file storage.
- Implemented client-side caching and data-fetching patterns to keep the app responsive as data grew.
- Hardened production features through targeted refactoring, bug fixing, and performance work.
- Worked in Scrum sprints, tracking delivery and team collaboration through Asana.

Full Stack Software Engineer, Vanaways, Bristol, England · Full-time *Apr 2024 – Dec 2024*

- Built scalable React + Node.js applications with a focus on clean, reusable frontend architecture.
- Designed and maintained RESTful APIs and backend integrations, improving database structure and query reliability.
- Set up containerized deployments with Docker, Nginx, AWS, Cloudflare, and CI/CD pipelines for consistent releases.

Full Stack Web & Mobile Developer, Pure Line Inc., Quebec, Canada · Remote · Freelance *Nov 2023 – Mar 2024*

- Tech-led full-stack delivery across web and mobile with Next.js, React Native, Node.js, and NestJS, collaborating closely with product managers and QA teams.
- Designed and documented REST APIs with Swagger and Postman, with automated coverage using Jest and Playwright.
- Built reusable UI components in Storybook and refined user flows for production-ready delivery.
- Ran cloud file-handling and deployment workflows on AWS (S3, EC2, Amplify) with Cloudflare and CI/CD, working in Scrum sprints.

Full Stack Developer, Self Employed, Morocco *Jul 2023 – Oct 2023*

- Designed and shipped multiple MERN-stack applications for freelance clients on Upwork and Fiverr, earning strong client ratings.
- Built data-driven backends integrating Spring Boot with PostgreSQL and MySQL.

- Added cloud storage and media handling with Cloudinary and AWS (S3, EC2), and managed delivery end to end using Agile, Jira, and Trello.

Desktop Application Developer Intern, ONEEP, Chefchaouen, Morocco *May 2023 – Jun 2023*

- Built a mission-order management desktop application in VB.NET with a SQL Server backend.
- Designed an intuitive interface that streamlined how mission orders were created and tracked.

Education
